

October 26, 2022

The Honorable Nancy Pelosi
Speaker
U.S. House of Representatives

The Honorable Charles Schumer
Majority Leader
United States Senate

The Honorable Mitch McConnell
Minority Leader
United States Senate

The Honorable Kevin McCarthy
Minority Leader
United States House of Representatives

Dear Speaker Pelosi and Leaders Schumer, McCarthy and McConnell:

The 4,000+ undersigned beauty industry professionals and small business employers strongly urge you to extend the 45B FICA tax tip credit to the beauty industry before adjourning this year.

The enactment of bipartisan legislation, sponsored by Representatives LaHood and DelBene and Senators Cardin and Portman entitled the *Small Business Tax Fairness and Compliance Simplification Act* (H.R. 821/S. 1233), would finally give the tens of thousands of employer-based beauty service establishments access to a tool designed to support small business and increase tip reporting compliance.

Salons and barbershops comprise the second largest industry with tipped employees. Our industry employs women and minorities at a rate two times higher than the national average. More than 85 percent of industry professionals are women. The majority of industry establishments are small businesses, with 83 percent employing less than 10 individuals. Extending the existing 45B credit would address an inequity that has existed for almost thirty years, create parity with the largest tip industry and allow these small business employers to redeploy these savings to further support their employees and expand their businesses.

A more accurate accounting of tip income is important for many reasons, but is critical for purposes of an employee's future Social Security benefits. The legislation not only provides a carrot to increase employment tax compliance, but more importantly, the bill helps ensure that employees will be credited with the employment taxes paid on their tip income. Employees are not benefitted under the IRS's current enforcement policy of assessing FICA taxes on the employer for underreported tip income.

This is a common sense measure that is long overdue. It's bipartisan; it's bicameral; there is no opposition; it supports employer-based establishments; and, it will help improve tip reporting compliance. Extending 45B is a win for the employer who can grow her business and reduce uncertainty. It is a win for the employee who will have increased retirement security and other benefits. And, it is a win for the government that will collect more revenue. Barber and beauty shops are an important part of your communities and should not be overlooked. These predominantly women and minority-owned small businesses deserve to have this measure considered for inclusion in any the year-end bill.

Respectfully Yours,

Nina Daily
Executive Director
Professional Beauty Association
